Title of	Mitimiti on the Grid 2					
project/research						
Amount of funding received	\$25,000 +gst					
Budget details	Mitimiti on the Grid 2					
	Spend to 15 Aug 2016			-		
	Description		Total spend to date (ex gst)	Budget allocation (ex gst)	Remaining budget (ex gst)	
	Priority 1: Web and mobile portal	Feb	\$9,587.50	\$20,000.00	\$7,942.50	
		Aug	\$2,470.00			
	Priority 2: Audio-visual (live streaming, camera, tripod, mics, stands, training vids)	Feb	\$227.50	\$4,000.00	-\$534.26	
	tripou, mics, status, training viusj	Aug	\$4,306.76			
	Priority 3: Training and community training videos	Feb	\$65.00	\$1,000.00	\$207.14	
	viueus	Aug	\$390.00			
	TOTALS	Aug	\$337.86 \$17,384.62		\$7,615.38	

Findings/learnings to date	1. Whanau are learning, self-learning, teaching each other, participating well in workshops, using multiple means to access technical support, and more. Confidence levels have noticeably risen.
	 Reconnecting disparate whanau around the world has become possible and locals are live streaming events and participating more actively with the tools to make it more possible for people to re-engage.
	3. The impact on economic growth will be measured next year by measuring electricity consumption (data) using UN model.
	4. The videos elements of this project took an interesting turn. Whanau who attended workshops opted to show the results of their training rather than build how to videos as they felt their confidence was still developing. So, four videos were published on youtube and provided some unexpected responses from whanau outside the area who were "watching" the day's proceedings. Relationship and reconnection is paramount to the whanau and marae and the videos provided a fantastic contribution to the re-engagement of whanau in the world.
	In addition, two cctv cameras were installed with the help of volunteer tech team members and Vodafone who were already in the area and who sent their team and a cherry picker to place a CCTV camera on a pole for the marae "surfcam".

	Selected marae members were given extra workshops on managing the feeds. There is a technical and protocols aspect to managing the CCTV cameras and they have a rare opportunity to learn these new skills. One of the cameras (surfcam) points out to sea and will be published online once the technical approach is selected.

	be and the second s					
Do you anticipate	Absolutely. The overall project has already had a few articles written,					
their being	has been presented at meetings and conferences in the IT sector and					
anything media-	has sparked some interest from government agencies (MBIE, TPK,					
worthy in your	others).
