What were the highlights of the conference?	<p><i>Industrial Summit :</i>  <i>The entire industrial summit was quite informative and was very useful.</i>  <i>The keynote <b>by Paul Ash, Director, National Cyber Policy Office</b></i>  <b>Department of the Prime Minister and Cabinet</b> was amazing. I have seen a new direction in understanding the cyber security aspect especially with his real world examples. This is like once in a life-time opportunity for enthusiastic researchers like me.</p> <p>My another favorite session was by <b>John Edwards, Privacy Commissioner</b> . This was both technical and informative. John Edwards presented a clear cyber security situation with respect to New Zealand and has explained about future directions.</p> <p>Other sessions were also good enough but these two sessions were most knowledgeable for me.</p> <p><b>Conference Session:</b>  I was unable to attend all the sessions as there were some parallel sessions going on. I liked some of the conference presentations.</p> <ol style="list-style-type: none"> <li>1. Cryptography with mathematical modelling (Fijian University)</li> </ol>

	<p>2. Determining the encryptions in Images(Swiss University)  3. Challenging the horizons of cryptography (USA)  My paper was attended by about 39 people and had some interactive session after that.  I made contacts with Mr. M M Rao, Head of School, Fijian University, Prof. Hemond from Swiss University and others., Mohit Sharma, Research, Indian Institute of Sciences, India.</p>
<p>What were the lowlights of the conference?</p>	<p><i>Nothing specific.</i></p>
<p>Was their media coverage or media-worthy content at the Conference?</p>	<p><i>There was media coverage but am not sure about the details.</i></p>
